PROFILE

Senior fullstack software engineer with **over three years of professional practice** built through density and diversity — consulting mission with UN-IT (late 2023), five inter-university tech initiatives co-founded in 2023, presidency and digital transformation of AEENI (200+ members) 2023 – 2024, multi-client portfolio as Project IT Manager at **UrisCom** since January 2025, IT training at SkillUP in 2025, Software Engineering professorship at **ESTI** since March 2026, and self-driven products (**Hello Soins .com** and Switzerland, **Lexia-IA**, **Moobiz V2**, **ONN fleet management**, **UACEEM**). Full autonomy across the **React / Next.js + React Native / Expo + Node.js / Express + Python / FastAPI + PHP / Laravel + PostgreSQL / MySQL** stack in production. **Strict TypeScript**. Senior-level applied AI practice (OpenAI, Anthropic, Google, ElevenLabs, RAG / pgvector, transcription, voice cloning). Delivery industrialized with Docker / Kubernetes / GitHub Actions. **Master by Research in Applied AI** and **Master II in Software Engineering & Databases** (ENI). Certified **Cisco Cybersecurity Essentials** and **Orange CyberSecurity**. French (native), English (professional), Malagasy (native).

EXPERIENCE

Project IT Manager — Lead Fullstack Developer — UrisCom | January 2025 — Present

- Design, develop, deliver and **maintain in production** a multi-client portfolio of fullstack applications: web **React / Next.js**, mobile **React Native / Expo**, backend **Node.js (Express, NestJS)**, **Python / FastAPI** and **PHP / Laravel** — with **strict TypeScript**.
- Design and expose **secured REST APIs**: versioning, middleware, **JWT / OAuth2** authentication, **Zod** validation, OpenAPI documentation.
- Administer **PostgreSQL** and **MySQL** in production: modelling, migrations, complex queries, indexing, EXPLAIN ANALYZE profiling, backup and restore.
- Integrate and operate **AI services**: **OpenAI** (chat completion, SSE streaming), **Anthropic**, **Google**, **ElevenLabs** (speech synthesis, real-time voice) — orchestration with **n8n**, **WebSocket** and **BullMQ / Redis**.
- Industrialize delivery: **Docker**, **Kubernetes / Minikube**, **GitHub Actions** (CI / CD), deployments to **AWS** and **OVH**.
- Lead multi-client relationships: requirement gathering, scoping, estimation, self-driven written reporting, mentoring of junior developers.

Software Engineering Professor — ESTI — École Supérieure des Techniques de l'Information | March 2026 — Present

- Teach **Frontend (React JS + strict TypeScript)**, **Backend** and **Algorithmics** in the engineering curriculum.
- Supervise student projects, active practice of **code reviews** and Agile methodology.

IT Trainer Consultant — SkillUP | April 2025 — August 2025

- Design and deliver sessions on Git / GitHub, Frontend, Backend, Algorithmics, and generative AI integration into the development cycle.

Consultant Developer — UN-IT | November 2023 — January 2024

- Technical fullstack mission: requirement gathering, tool development, delivery, client coordination, knowledge transfer.

President and Digital Transformation Lead — AEENI — École Nationale d'Informatique | February 2023 — April 2024

- Lead a student organization of 200+ members: representation, coordination, mediation with the administration.
- Drive the digital transformation of student life and of the support provided to students, staff and faculty (websites, collaboration tools, communication).
- Manage the budget, social life, events and resource allocation.

Co-founder of Tech and Cultural Initiatives — DevHunt, HackHunt, Robot Hunt, ENI Novice Immersion, Hack IT (Univ. Fianarantsoa), Bachelor IT (Fihary Soft), ENI Hôtesses, Miray Tournament | 2023

- Design and lead five inter-university tech initiatives — development hackathon (DevHunt), competition (HackHunt), robotics (Robot Hunt), engineering orientation forum (Bachelor IT), inter-university hackathon (Hack IT).
- Found the **ENI Hôtesses** organization (staff setup) and co-found the **Miray Tournament** (sports and cultural event, including the ENI 40th anniversary edition).

SELECTED PROJECTS

Hello Soins (.com and CH) — Digital health, Madagascar + Switzerland: Web and **React Native / Expo** mobile platform in production — **Node.js** backend, MySQL, Firebase — hosted on AWS and OVH.

Lexia-IA — AI-assisted audiovisual production: Remotion + ElevenLabs + HeyGen pipeline with TikTok / Instagram distribution — **OpenAI** orchestration, Python backend, Next.js frontend.

Moobiz V2 (Peru) — Multilingual, geolocated platform: Python / FastAPI backend, **PostgreSQL / PostGIS**, Blade / Livewire + Inertia / React frontend, Flutter mobile — REST API specifications, application security, LPDP compliance.

ONN Anosy — In-house fleet management platform: Fleet management built **from scratch**: vehicles, bookings, missions, fuel, maintenance — Laravel + MySQL.

UACEEM — Digital transformation of a multi-site private university (MG): Academic management, RBAC, cross-campus integration, student and faculty portals — Laravel + MySQL.

UrisCom client portfolio: Multi-client fullstack applications, integrations of business APIs, **n8n** automations, real-time WebSocket, containerized hosting.

TECHNICAL SKILLS

Frontend: **React JS**, **Next.js** (App Router, SSR / SSG, API routes), **React Native / Expo** (expo-router, iOS and Android builds), **strict TypeScript**, HTML5, CSS3, Vite.

Backend: **Node.js** (Express, NestJS, Sequelize, Prisma), **Python / FastAPI**, **PHP / Laravel** — layered architecture, services, repositories, middleware, dependency injection.

APIs & microservices: Design, versioning, **JWT / OAuth2** security, **Zod** validation, OpenAPI documentation, API Gateway, Postman testing.

Databases: **PostgreSQL** (production, **pgvector**), **MySQL**, MongoDB (academic and personal) — modelling, indexing, advanced queries (CTE, window functions), EXPLAIN ANALYZE profiling.

DevOps & delivery: **Docker** + Docker Compose, **Kubernetes / Minikube**, **GitHub Actions** (CI / CD), hosting on **AWS**, **OVH**, cPanel, o2switch, Heroku.

Applied AI: Integration of **OpenAI**, **Anthropic**, **Google**, **ElevenLabs** — chat completion, SSE streaming, Realtime, speech synthesis and real-time voice. **RAG** pipelines (pgvector), **audio transcription**, **voice cloning**, **AutoML**, **Explainable AI (XAI)**. Master by Research in AI.

Automation & orchestration: **n8n** (workflows, webhooks, multi-API orchestration), real-time **WebSocket**, **BullMQ / Redis** (workers, retry, dead-letter, scheduling), **Playwright / Puppeteer** (resilient scraping).

Testing & quality: **Pytest**, **Jest**, **Playwright**, **Cypress**, **Selenium** — unit, integration, E2E. Systematic code reviews.

Application security: OWASP, **JWT / OAuth2**, secret management, encryption, HTTPS, least-privilege principle. Certified **Cisco Cybersecurity Essentials** and **Orange CyberSecurity**.

BI & office: **Power BI** (datasets, visualizations, DAX), advanced **Excel** (formulas, pivot tables), Microsoft Office, Google Docs.

Project management: Trello, Notion, Composer, XAMPP, pipenv — Agile / Scrum, proven teaching skills (ESTI, SkillUP).

Languages: French (native) — **English (professional)** — Malagasy (native).

EDUCATION

- **Master by Research** — École Nationale d'Informatique (ENI), 2024 – 2025. Applied AI for data analysis.
- **Master II** — École Nationale d'Informatique (ENI), 2023 – 2024. Software Engineering & Databases.
- **Master I** — École Nationale d'Informatique (ENI), 2022 – 2023.
- **Bachelor's Degree** — École Nationale d'Informatique (ENI), 2021 – 2022. **Top 10 of promotion.**
- **Baccalaureate, Series C** — Lycée Saint François Xavier, 2018. Grade: Fairly Good.

CERTIFICATIONS

- Cisco Networking Academy — Cybersecurity Essentials (December 2023).
- Orange Digital Center — CyberSecurity (November 2023).
- Orange Digital Center — Cloud Computing (November 2023).

SOFT SKILLS

Communication and teamwork: clear information sharing and effective collaboration with technical and business teams — daily written reporting across multiple clients. **Problem-solving and adaptability:** root-cause identification, flexibility under change, multi-stack portfolio. **Leadership and management:** AEENI presidency (200+ members), mentoring of junior developers, IT project delivery at UrisCom, engineering teaching at ESTI. **Critical thinking and knowledge sharing:** systematic code reviews, SkillUP training, engineering teaching, transmission through documentation (README, OpenAPI, runbooks). **Production rigour:** real-user projects, zero tolerance for incidents, systematic reading of existing code before any modification.
